Fire danger is **MODERATE**. Another warm and mostly sunny day with Rh for much of the state in the 20's% range. Winds are generally under 10 mph across most of the state, except for the Champlain Valley and scattered locations across northern Vermont where winds are stronger and gusts are more frequent. Fine dead fuels are dry as are the larger dead fuels due to the long term dryness. Ground fuels continue to dry across the state and are exceptionally dry in western Vermont.

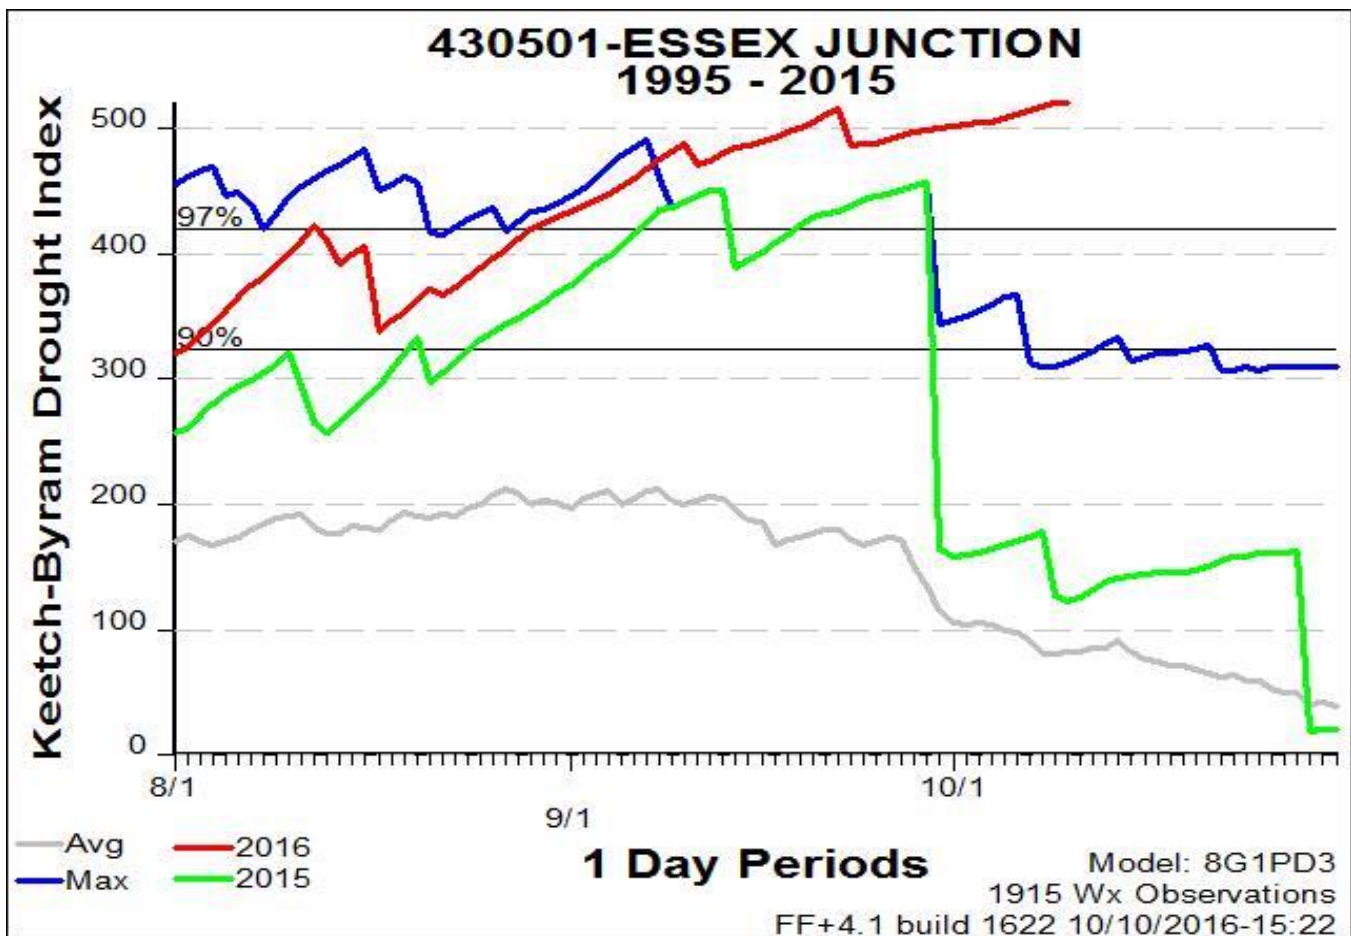

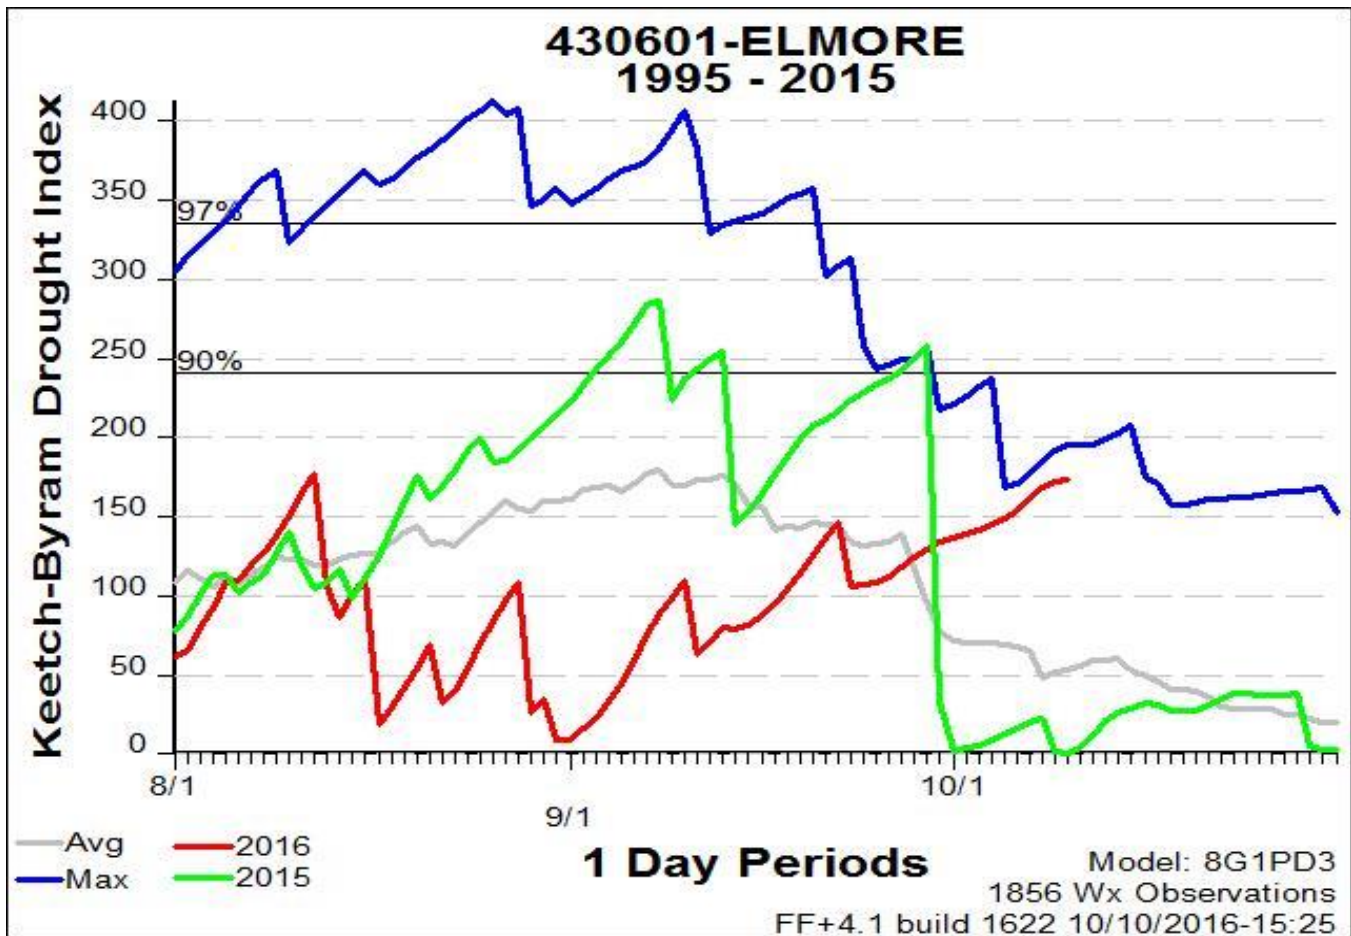

Showers are expected tomorrow along with strong, gusty winds. Between .1 and .25 inch is expected for most of the state, however, fire danger will remain **MODERATE** until showers arrive due to long term dryness and winds.

[Six Minutes for Safety: An interagency safety initiative that address high-risk situations that historically get firefighters in trouble.](#)
